

NTUSU's Statement on Study Spaces on Campus AY 20/21

Dear Fellow Union Members,

NTUSU would like to thank our students for their feedback and suggestions with regards to the lack of study spaces on campus. Over the past few weeks, the Union has been working closely with the University regarding this issue in order to mitigate the problem.

We would like to announce that the University has now made a number of TRs and LTs available for use as study spaces, from Mondays to Fridays, 8:30AM to 8:30PM, without the need to place a booking. These rooms include TRs at the Hive, the Arc, and LTs across the campus. Students may tap their matric cards at the card readers to gain access to the TRs and LTs during this window of time. Air-conditioning will be turned on when the occupancy sensor detects (an) occupant(s) in TRs and LTs, whereas lighting will need to be turned on by manual switches near the entrances.

Throughout the semester, there may be some facilities blocked by the University for specific purposes (ongoing classes, meetings, etc). Once these rooms are blocked, students would not be able to gain access to such rooms and are advised to look for other rooms.

Nevertheless, NTUSU would like to remind students to exercise individual social responsibility and continue to adhere to safe distancing measures at all times, in accordance to the MOH advisory. Students are required to keep their masks on while studying, and practise good hygiene when using school facilities. Groups of more than 5 are not allowed, and students must keep a safe distance of at least 1 meter away from other groups at all times. As part of the NTU community, we all share this collective responsibility to co-create a safe environment in NTU.

For submission of general enquiries or other suggestions, you may write in to su-feedback@e.ntu.edu.sg.

Warm Regards,
NTU Students' Union
